

Introduction

The Garland Cemetery is located on the south side of Ridge Road (Rt. 104) approximately 1.5 miles east of the Town of Clarkson, in Monroe County, NY. The cemetery dates from the early 1800s, the earliest date on a tombstone is that of Patty Ferris, the wife of Sylvanus Ferris, who died on September 12 1813.

This listing is the result of the work of many people over many years. It should be noted that this is not a publication of the Garland Cemetery Association, nor is the accuracy of this listing endorsed by the Association. In the 1980s the stones were read and recorded by Mary Smith, Hazel Kleinbach, Ruth Rayburn, DAR members, and others. Confirmations and additional burial information were added from the records of Ruth Slater, Lloyd LaDue, Evelyn Baxter (Mrs. Dayton) and Bob Wheeler. Other information was added from the records of the Fowler Funeral Home, local town records, monument company records, and obituaries appearing in the various newspapers.

Despite the considerable effort which was put forth, the results were not printed and made available to the general public at the time. However, in the past several years there has been an upsurge of interest in genealogy, and with it, a corresponding desire to have records such as this made more accessible.

In 2005, the Garland Cemetery was canvassed again to make corrections and to bring this listing up to date. During the 25 years since the last readings were made, there are some stones which can no longer be found, and several others that have deteriorated to the point where they can no longer be read. In addition, there are many stones scattered throughout the cemetery that bear only the initials of the buried person. These have not been listed because they are not specific and could belong to any one of several persons with the same initials.

Unfortunately, not all of the persons in the listing can be confirmed by the presence of a stone. If an "NSF" appears in the last column of this listing, no (readable) stone was found in 2005 to confirm the burial data that appear in the previous listings. Additional proof should be obtained by consulting the official cemetery records or other reliable sources.

D. P. Specht
